

AMATEUR ALL-STAR SHOW FEB. 27

MOKENA IM. LUTHERAN CHURCH
SCENE OF LOVELY WEDDING FEB. 13

At a lovely church wedding which took place in the Immanuel Lutheran church at Mokena, Saturday afternoon at three o'clock, Miss Georgia Bennett, daughter of Mr. and Mrs. George Bennett of Mokena, became the bride of Mr. Raymond Bernard, son of Mr. and Mrs. William Bernard of Orland township. The pastor, Rev. A. W. Gode officiated at the double ring ceremony. The church altar was decorated with palms.

Preceding the service, Teacher R. Hülger, of Eagle Lake, Ill., a cousin of the groom, played a group of love songs on the organ and also the wedding march and recessional.

Also: Dorothy Propert of Blue Island, sang "O Perfect Love" and "The Lord's Prayer."

The bride was given in marriage by her father, and wore a white satin gown, made in princess style with a long train, a finger tip veil which was caught with a pearl tiori. Her colonial bouquet was made of white roses. Her only jewelry was a string of pearls and pearl ear rings, the gift of the groom.

Miss Donna Bennett served her sister as bride's maid. She wore a blue satin gown, with a tucked peplum, long sleeves. Her head dress was a braided coronet of the same material as the dress and she carried pink roses.

Serving as bride's maids, were Miss Marguerite Kimmel and Mrs. Sally Cooper, both of Orland Park, and Miss Lorraine Neitfeldt of Homewood, a cousin of the groom. They wore identical gowns of light blue with braided coronets in their hair. Their flowers were red roses.

Little Dorothy Stelter, of Tinley Park, cousin of the groom, was flower girl. Her gown of satin was identical to that of the maid of honor, and she carried a colonial bouquet of pink roses.

Norman Bernard served his brother as best man and Richard Martie of Mokena, Gilbert Neitfeldt of Homewood and Fred Yunker of Tinley Park were ushers.

A wedding dinner was served in St. Mary's hall at six o'clock to about 200 relatives and friends, the Ladies Aid society of the church doing the serving.

In the evening a reception was held when 300 attended. Dancing was enjoyed.

The new Mr. and Mrs. Bernard have gone to housekeeping in an apartment in the home of the groom's parents.

The groom is employed as a machanic at the Bettenhausen and Moss implements at Tinley Park and the bride works for the Rock Island railroad at their Hamilton Park office. Both are graduates from the Orland Park high school.

BURGLARS ENTER
FRANKF'T HOMES

Last Wednesday evening when Harry Balchowsky returned home from his duties at his store in Frankfort, he was surprised to find that unwelcome guests had taken possession of his home for a while.

Mrs. Balchowsky was in Chicago visiting her mother who is ill in a hospital. When Mr. Balchowsky returned he was surprised to find the kitchen door unlocked and thought his wife must have forgotten to lock it. But when he entered the house, he soon knew different, as all the drawers in the buffet were open and in disorder.

Upon further investigation he found the dresser drawers in Mrs. Balchowsky's room had been thoroughly ransacked, a box of handkerchiefs were strewn on the floor and money was missing. Several diamond rings were untouched. In Mr. Balchowsky's room everything there had been ransacked also. The window shades in the house were all drawn.

In the home of Mr. and Mrs. Burdette two doors west of Balchowsky's, burglars entered there also. No one was at home at the time, and \$300 and a loaded gun was taken.

The neighbors stated they had not seen any strange person around.

The sheriff's office was notified and fingerprints were taken. A thorough investigation is being made.

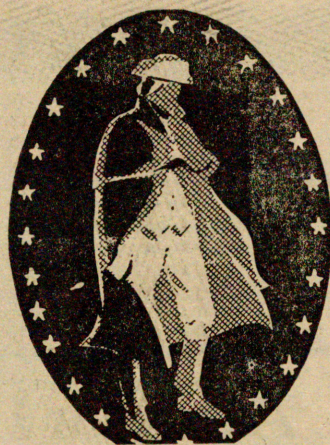

\$10,000 For Death
Of New Lenox Man

For the death of Jerome William Salz, 28, of New Lenox, a switchman for the Santa Fe railroad who was killed while at work February 2, the railroad has agreed to pay \$10,000 to his estate, although denying liability in the accident.

The probate court named Mrs. Edith F. Holtz of Chicago, mother of Salz' widow, Jane as administratrix of the estate. Beside his widow, Salz' only other heir is his young son Michael.

George Washington was the Father of our Freedom. His belief in Liberty has spread around the world. He was born on the banks of the Potomac in Westmoreland County, Virginia on February 22 1732. He was unanimously chosen President of the United States and was inaugurated on April 30 1789 at New York City.

He was chosen a member of the commission that selected the site for the proposed national capital. He chose a spot that might be seen from Mount Vernon. The city was named for him. He participated in laying of the cornerstone of the Capitol on December 12, 1793. He caught cold from riding in a storm of sleet and rain and died two days later. Cause of death said to be acute laryngitis.

We honor his memory on his birthday.

One World—At Prayer

Tennyson's beautiful lines about prayer that binds the whole round earth: "by golden chains about the feet of God", might have been written especially for the World Day of Prayer which is traditionally observed on the first Friday of Lent, which is March 4.

The Methodist church at Orland Park will observe the day with special services at two o'clock. The theme this year is: "The Lord Is My Keeper." The United Council of Church women invite all peoples to join in a fellowship of prayer on this day, and the Orland group invites all in this territory to attend these services.

Millions of women today in seventy different countries will kneel at the altar of God—to pray. Unified by prayer to the same God we kneel as relatives in the same family with the same name—Children of God.

The prologue of prayer is spoken by women of the Fiji Islands, who live near the International Date Line. The murmuring prayers continue westward following the sun until after many hours the Great Amen is sung in the cold Arctic and at the same moment in the tropical Tongas where Queen Salote leads the kneeling hosts in benediction.

In a thousand differing tongues our prayers will rise and from a thousand differing temples, the Lord of Life hears all. His spirit hovers above those who pray under the shade of His trees; it warms the hearts of those who worship in cold, barren rooms; it moves up and down the aisles of high cathedrals; and the Presence will be real in thatched-roofed chapels and bring a glow to mud-walled huts. God will precede His worshippers into hospitals and factories and radio stations.

Some will pray for bread and some for clothing. All will pray for peace and a deeper communion with God.

CHURCH UNITY
IN GERMANY

By Rev. William Riemann, Mokena

Among the forces that divide and despoil, there is one force the German Evangelical church, that unites and rebuilds the morale of the people in a war-torn country. Time weekly magazine reports that 120 leading Calvinists, Lutherans and Unionists gathered in the Westphalian city of Bielefeld recently to hold the first regular meeting of EKID, the Evangelical church in Germany. They represented the 35 million protestants of Germany.

The spearhead of the unification movement was a "white-bearded grand old man," Bishop Theophil Wurm of Wurtemberg. After the war he became the chairman of the provisional Evangelical church in Germany. His task was to pick up the broken pieces of the church in Germany after the Hitler debacle. He threw all his strength and talent into this, writing letters and traveling from church to church to reconcile the varying viewpoints. He succeeded admirably not only in uniting the churches administratively, but also spiritually.

The new church allows each church to hold its original viewpoint on Holy Communion, but provides that all Protestants can partake of the sacrament in any Protestant church in Germany. When the new constitution was adopted after five days of heated debate, Bishop Wurm declared: "The new German Evangelical church is not yet a mighty cathedral; it is still a modest hut. But it is a hut in which the gospel is at home, and in which all brethren of the Protestant churches may live and grow together."

Mokena Woman Guest
At Banquet Given For
Delinquent Boys' Fund

Mrs. Anton Benson of Mokena who spent the week end with her daughter, Mr. and Mrs. Gordon Swanson, and her son Mr. and Mrs. Edwin Benson in Rockford, attended a most interesting banquet there last Thursday evening.

The banquet was held in the Zion Lutheran church in Rockford which the Swansons and Bensons also attend. The speaker at the banquet was most inspiring and informative speaking in behalf of the delinquent boys at the St. Charles state institution. The funds from the banquet went into a fund for work among the boys at the institution.

BOX SOCIAL AT SUMMIT

L. E. PIONEER
DIED FEB. 13

Herman Gustaf Kluth of Lincoln Estates, who suffered a heart attack while at work last Thursday at the Moldit, Inc. at Frankfort, and who was removed to Silver Cross hospital at once, passed away Sunday morning.

He was born in Chicago 59 years ago and moved to Lincoln Estates 19 years ago, being one of the first residents of that community.

He is survived by his wife, Agnes; and daughter Carleen at home; three sons, Irvin of Chicago and Paul and Marvin of Lincoln Estates and also his father Gustaf Kluth who lived with the family.

Funeral services were held Wednesday afternoon at 1 o'clock in the Lane funeral home at Ashland and 95th with burial in Waldheim cemetery, Chicago.

ORLAND PLAYS TOURNAMENT FEB.
23. WJOL TO BROADCAST

Orland Park basketball team is participating in this season's tournaments. They will play at Grant Park in the school gym, Wednesday evening, February 23 against Peotone, the second game of the evening. The first game will be Braidwood vs. Beecher.

These games will all be broadcast over the Joliet station WJOL with Davidson Coal company at Orland

It will be recalled when the Mokena P. T. A. sponsored an amateur show several months ago, and two winners were picked, that these winners would later compete with winners from a number of other like shows. At the time it was not known where the final show would be held, until this week, when Mr. Bert Parkinson and Mr. Clark, managers of the shows, notified Mrs. Berle Needham, that the final show would be held in Mokena.

Mokena feels rather proud of the fact that it was picked for this outstanding event which will be held on Sunday afternoon and evening, February 27. The afternoon show will be broadcast over station WJOL and will start at 7:30 o'clock. The winners will be picked at the evening show.

Competing in this all star amateur show are some very fine talent, coming from 12 different towns.

The winners will be chosen by judges, the applause meter will not be used for this event. The judges will be people of ability and capable of doing a very fair and good job of selecting the winners.

Competing in this show from Mokena will be Donald Helenhouse from Mokena and Betty Lou Kampe from Frankfort.

You will want to get a ticket early, and get to the Mokena school gym early, to be assured a good seat.

Florence P. Walsh's
Wedding Announced

Mrs. Carmel Erickson will be leader and Mrs. James Campbell co leader in charge of the second grade girl's troop which will meet Thursday afternoons after school. There are 13 girls in this troop.

LOSES FINGERS
WHEN HAND WAS
CAUGHT IN PRESS

Clifford White, better known as Doc White, suffered serious injury Wednesday evening February 3 while working at the Aluminum plant at Lemont.

Mr. White operates a press machine and because of a rush in business, a night force was working that week. The press machine, which works automatically, in some way caught his right hand crushing three fingers and half of his palm. He was removed to St. Joseph's hospital where the three fingers and part of the palm were severed.

Mr. White who is married and has four children, lives on 159th street. Mrs. White is a daughter of Mr. and Mrs. Fred Brown of Frankfort.

R. Strasberg Received
Degree at Purdue

FROST

Robert Mann, Supt. of Conservation

In warm weather, on calm clear nights the surface of the earth quickly cools as it radiates its heat up into the sky. Heavy cold air settles into every valley and depression. This surface layer of air becomes further cooled to the point where, if it is damp and the earth is moist it must lose some of its moisture, and this is deposited on plants and other objects near the ground as "dew." On cloudy nights when there is less surface cooling because the clouds act like a warm blanket, and on windy nights

when the air is kept mixed and prevented from settling, little or no dew will form.

Under conditions otherwise favorable for dew, but when the temperature during the night goes below the freezing point, then "hoar frost" forms. In late fall and early spring it usually appears as a white coating of fine ice needles, spine like or feathery shrubs and trees will be silvered with a delicate fur of frost; roofs of buildings will be coated white. Sometimes when the air is too dry or windy for hoar frost to form, but the temperature falls several degrees below 32 degrees Fahrenheit, we have a "black frost"—so called because many plants

freeze and later become limp and black when thawed out by the sun. Frost damage to a plant is not caused ordinarily by the frost crystals themselves, but by freezing of the plant juices, which disrupts the plant's living substance and the tubes bringing nourishment to it.

Some garden plants, such as tomatoes and especially tropical plants like peppers and eggplant, are extremely sensitive even to a light frost. The length of the growing season for most hardier plants is measured from the date of the last killing frost in spring until the first killing frost in autumn. This is vitally true of corn, our principal crop in the Middle West and most valuable crop in America. Occasionally a late spring frost will make it necessary to replant large acreages; more often planting is delayed by continued rains and cool weather. With such a late start a severe frost early in September may so damage the immature grain as to greatly reduce the yield for that year.

Other crop plants like wheat, rye, alfalfa and clover which commonly live thru the winter, may be injured by frost in the ground—especially in periods of alternate freezing and thawing—causing the soil to swell and "heave", perhaps several inches breaking the roots and exposing them to the air. Sometimes the trunk of a large tree will be split by "frost" with an explosion like the crack of a cannon, due to freezing of the moisture within it. On the other hand, the seeds of some plants—such as the Alpine Willow—some common weeds and certain nut trees—cannot germinate until they have been frozen. Frost helps keep soil loose and crumbly. Frost too plays an important part in splitting rocks and causing them to disintegrate into fine particles which, carried by wind and water become part of the soil.

The windowpane patterns of frost, on a bitterly cold morning are beautiful, unique and never the same. An imaginative person can see funny faces, beautiful landscapes; fairy castles or forests and towering ferns. Geometrical designs, a spider's web; tiny blossoms and leaves or intricate lace may be etched in gossamer lines that sparkle in the sunlight. Try blowing on such a frosty pane until your breath melts the crystals into a film of water. Then step back and watch the frost reform a new design. We are told the air of the room must be moist; that various combinations of temperature and moisture affect the formation of the frost crystals; and that they are affected by the thickness of the glass, its structure and its cleanliness.

Phooie! Let's give Jack Frost a big hand!

Eleven Immortals

Lesson for February 20, 1949

JESUS BELIEVED in prayer, but he did not usually spend all night at it. When he did, we may be sure he had something of the greatest importance on his mind. One of these occasions was the night before he selected the twelve men he called Apostles. He had thousands of disciples, crowds followed him wherever he went. But it was important to have a few with whom he could live as an intimate friend. So from the immense number of followers, Jesus selected twelve closest friends. Before that fateful morning no one outside their villages had ever heard of them. But now their names are known—and eleven of them are honored—around the world.

Dr. Foreman

Jesus Multiplies Himself

A GOOD executive, Jesus multiplied his own personality. A recent book has shown how Harry Hopkins during World War II lived in the White House as Roosevelt's personal companion, having given up his own ambitions and living only to carry out the ideas of his chief. Without Roosevelt, Hopkins would have been little more than an inferior politician; and without Hopkins, many of Roosevelt's plans could not have been carried out. He enabled the president to be in two places at once. So it was with Jesus, as Mark tells us. Jesus wanted those twelve to be with him, and then to send them out.

He wanted these friends to know him as the crowds, and his enemies, never could know him. He wanted these men to absorb his ideas and ideals.

By continual contact, day by day and month by month, they would inevitably become more like him. Because of that, he could (and later did) send them out to do his work in places he could not reach. The word Jesus used for them was not his own invention; "apostle" was the word used all over the civilized world in those days for an ambassador, a personal representative of royalty. All Christians are in the "apostolic succession." If a Christian can truly say, "I live, yet not I, but Christ liveth in me," then he is, as these men were, Christ's personal representative.

Raw Material

THE ASTONISHING thing about Jesus' choice of these twelve is his faith in them. Of course they had faith in him—who would not? But who would have faith in them? There was not a single "outstanding" man in the lot. Not one had what we would call a college education, not a man of them had held public office or was rich or famous for anything at all. The officers of any modern church might shake their heads over them.

There was Peter, an ordinary fisherman, much given to profanity; there was Matthew, a crooked business man if ever there was one, for no publican could be honest and keep from starving; there was Philip, as stupid a man as ever asked a foolish question; there were James and John, loud-mouthed (Jesus nicknamed them the Thunder Boys—"Sons of Thunder"), greedy fellows who could not be satisfied till they had elbowed their way ahead of everybody else; there was Thomas the born pessimist, the defeatist... What could have got into Jesus' mind to select such men?

—And Judas Iscariot

THE SECRET of Jesus' choice was this: He selected his men not for what they were or had been, but for what they could become, filled with his spirit, transformed by his friendship. It is so today, as always. The Kingdom of God needs men and women, but the raw human material found in or out of the churches is too shabby and weak to build anything like the kingdom of God. "Twelve Immortals"—? Nay, but one is the immortal betrayer and suicide. Why? The reason was in Judas, not in Jesus.

The truth is that Christ will not force himself on any one, not even on an Apostle. Christ needs men, now, as he needed men then, to carry on his work in this world.

But he wants volunteers, never forced labor. The Christ of Glory can be served by the humble; but the free Christ can be served only by free men with open hearts. Judas may keep his heart shut if he will; Christ never forces his way in.

GULLIES CAUSE GREAT LOSS

The sinister meaning of the many gullies, both large and small that are cutting their ways across our farm fields goes unnoticed by too many people, said Mr. Conrad Borms the Chairman of the Will County Agricultural Conservation committee.

"These gullies," he maintained "issue a silent and too often unheeded warning—a warning of soil loss, of potential food production destruction that neither the individual farm owner or the nation can afford to tolerate. They are like a cancer eternally gnawing at the source of our foods—the strength of the nation."

The committeeman suggested that everyone give some thought to this matter of gullies and ditches that show up so extensively. "The people from town," he said "may look upon them as ugly scars—a problem of erosion and of concern only to the farmer. Actually though it's much more serious, for gullies indicate the washing away of valuable topsoil—and that's of concern to all of us. "We might better appreciate this matter if we were to look upon gullies as a destructive force, actually taking from our present and future grocery shelves huge stocks of potatoes, meats and all other edible soil produced goods."

To prevent this loss, farmers are advised to turn to both preventative and corrective measures. Chairman Borms pointed out that most of these measures are found in the practices

"Please help me!"

It was just 2:13 in the afternoon when an Illinois Bell telephone operator answered a call on her switchboard and heard a woman screaming.

Swiftly, she turned the call over to her supervisor, Mrs. Edna R. Lejcar, who succeeded in calming the frightened woman within a few moments.

"Please help me!" pleaded the voice on the wire. "My baby's choking!"

Mrs. Lejcar, a mother of two sons herself, gave instructions on how to relieve the choking infant. Then she got the customer's home address, called the Fire Department and ordered an inhalator squad to the scene.

Finally, she checked her emergency list of doctors, located one in the neighborhood and asked him to rush to the woman's home. All this took just two minutes from the time the first signal appeared on the switchboard... two minutes that averted a tragedy.

Mrs. Lejcar received the Telephone Company's coveted Vail Award for her cool-headed efficiency. But she prizes even more the knowledge that she was instrumental in saving the baby's life.

The value of your telephone is immeasurable in emergencies. And it's still a big bargain in everyday activities, too. It saves time, worry... and money. Illinois Bell Telephone Company.

The New Look

By Dr. Norman Vincent Peale
(Editors' Note: Dr. Peale is minister of historic Marble Collegiate Church on Fifth Avenue, New York City; and author of the current best seller "A Guide to Confident Living.")

Only recently did I find out the meaning of the phrase, "The New Look." The other evening I asked my wife and daughter what it means. Their answer was to lay some style magazines before me. I regarded them with interest, even astonishment. Those style pictures reminded me of a text from the Bible, "There is nothing new under the sun." If you will open up the old family album of about the year 1905, you will see the old-new look.

But there is another "New Look." It is the look planted on the countenance that indefinable glorious evidence of radiant happiness that is beyond this world. It is something in the demeanor, in the way a man carries himself; in the flash of the eye, in the light of the face; some marvelous transformation of the entire nature. That is the real "New Look."

That genuine "New Look" was referred to a long time ago by St. Paul when he said: "If any man be in Christ, he is a new creature; old things are passed away; behold all things are become new."

Following this precept is a man I know, the president of a girl's college. He has an old-fashioned notion that he is running a college established by Christian people and he keeps it that way. He hires no teachers who do not

have a definite belief in Jesus Christ as Lord and Savior. Fortunately his college is not located in a state where by some misguided idea, one is required by law to keep silent about religion. Most thoroughly I believe in non-discrimination but it is ridiculous to command it by state law, making it illegal to ask an individual if he has faith in God. The net result of that is to drive a great wedge between God and business, between God and education, merely because the politicians are afraid they will lose the votes of some minority group.

This college president asks applicants for teaching positions if they believe in God. He maintains that his job is to create great souls in the young women who study in his college and he does just that. He told me about six girls who were a bit on the sophisticated side. In one of their classes they had a professor who had something and he transmitted it to these girls—it was a spiritual radiance and power.

These six girls asked, "Professor we have come to you with a scientific question. Is it possible for a human being to know Jesus Christ, to know God the way you talk about him? If so how does one go about it?"

He replied, "Go into the chapel each morning and evening for two weeks and pray and meditate. As you go into the chemistry laboratory to perform experiments, pray for Jesus Christ to come into your hearts to give you a sense of His presence."

They followed his advice. Five of the girls came back to the professor and joyfully declared, "We found it." The president reports to me that a strange change has come over these

five girls. I asked him what it was. "Well," he said "there is a radiant glow about them, they are even prettier than they were. There is a bubbling effervescence about them, there is a light on their faces." He didn't say it but what he meant was they had the "New Look!"

Yes, if any man be in Christ he becomes a new creature, old things

pass away and instead comes the look of calmness, the look of peace and radiant happiness on the face revealing a strange happiness in the soul. It is very wonderful what happens to a human being when he gives his heart to Jesus Christ.

"I'm Bright as a Button..."

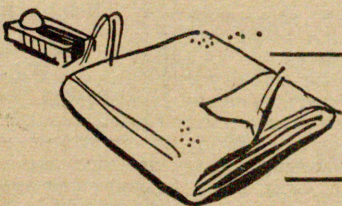

"I wake up feeling bright as a button... since I've been sleeping under my electric blanket. Its gentle warmth lulls me to sleep in a jiffy... and helps me really stretch out and relax. I think it's wonderful, too, that just one blanket keeps me so completely comfortable, in spite of changing temperatures. Small wonder I wake up bright-eyed and rested."

It's easy to enjoy this modern sleeping comfort... just set the dial to the temperature you want, turn on the switch, and fall asleep assured of being comfortably warm until you awake in the morning. No matter how the temperature in your room drops or rises, the automatic control of your electric bedcover will make sure you stay just as warm as you want to be. Fresh air fiends can open the windows as wide as they like... and still sleep in warm comfort.

You'll find electric bedcovers are easy to care for, too... blankets can be laundered and comforters cleaned with no trouble at all. And if you're interested in cutting fuel bills you can still sleep in comfort when the heat is turned down low. You'll be bright as a button when you sleep under electric bedcovers.

...because my Electric Blanket gives me real sleeping comfort!"

There are several types of electric bedcovers from which you may choose: Electric Sheets \$29.95; Blankets (Twin Bed Size) from \$39.95; Blankets (Double Bed Size) from \$41.95; Comforters \$49.85. All prices include Federal Excise Tax.

WASHINGTON
NEWS LETTER

From Congressman N. H. Mason

Our Reciprocal Trade Agreements
Program.—The United States adopted
its Reciprocal Trade Program in 1934.
The program has been in operation
fourteen years. Its objective is to re-
duce or remove world trade barriers
and permit the free flow of goods be-
tween countries, thereby removing one
of the principal causes of war. That
is an excellent objective, a very
worthy purpose. How has it worked
out? Testimony given before the Ways
and Means Committee at recent hear-
ings brought out the following very
disappointing facts:

1. After 14 years, world trade barriers
are greater than ever before. 2. We
have experienced World War II, and
the world today is in greater fear of
war than before World War II was
fought.

3. American industries are being in-
jured—pottery, household, glassware;
watches; American workers have lost
their jobs; yet the impact of the pro-
gram upon our American industries
has not fully developed.

Are Reciprocal Trade Agreements A
Success?—Dr. Clair Wilcox, formerly
Director of the Office of International
Trade Policy of the State Department
and one of the best posted men in
America on our foreign trade program
in commenting on the results of the
14-year record of our Reciprocal Trade
Agreements Program, made this state-
ment before the United States Cham-
ber of Commerce Institute on June 15,
1948:

"The Trade of the World today is
more tightly regimented than it ever
has been before in history, in time of
peace. The tariff is the old-fashioned
method of restricting trade. It is the
mildest method of restricting trade
that exists at the present time. As a
matter of fact, a nation that confines
trade restriction to the use of a tariff
today can be said to be pursuing a
liberal trade policy."

The June, 1948 Monthly Letter of
the National City Bank of New York
contained the following statement:

"Foreign producers criticize our
protective duties on certain articles.
Nevertheless, the United States mar-
ket generally is freer of access today
than practically any other market in
the world."

Embargoes, quotas; preferences; im-
port license restrictions; currency man-
ipulations; subsidies, state in time of
other devices have been adopted by
foreign nations to control the move-
ment of trade. They are much more
restrictive than simple tariff barriers.
Our feeble tariff restrictions are as
nothing when compared with these
foreign trade barriers set up by gov-
ernments that have entered into Recip-
rocal Trade Agreements with us.

The American Watch Industry.—We
have built up a watch industry in the
United States that gives employment
to thousands of workers. These work-
ers are paid a reasonably high wage
that enables them to live decently upon
a standard of living that is the high
est in the world. Switzerland, under
our Reciprocal Trade Agreements Pro-
gram, has been dumping millions of
watches on our American market at
far less than it costs to manufacture
them here. This has forced our factor-
ies either to go out of business, or to
go on part time production. We have
promoted imports, but have we pro-
moted our national welfare? What is
the difference between importing cheap
labor to compete with our American
Labor—which our immigration laws

forbid—and importing the products of
cheap labor to compete with the pro-
ducts of our factories—which our Re-
ciprocal Trade Program permits—
thereby robbing our factory workers of
their jobs?

NATIONAL SOCIAL HYGIENE DAY

The observance of National Social
Hygiene Day held Feb. 2, 1949 stressed
the need for protecting families
against venereal diseases, according to
Dr. Roland R. Cross, state director of
public health.

Records of the state department of
public health indicate that venereal
disease is declining in Illinois. The
15,426 cases of syphilis reported up
to December 4, 1948 compare with
17,896 cases in the corresponding per-
iod of 1947. Likewise gonorrhea case
reports declined from 9,944 in the
first 45 weeks of 1947 to 29,512 in 1948.

Despite these gains against venereal
infections, syphilis and gonorrhea are
still far more prevalent than other
serious communicable diseases, Dr.
Cross said.

SHELTERS ON ICE PERMITTED

Illinois fishermen have been remind-
ed by Livingston E. Osborne, state di-
rector of conservation, that the state
fish code permits the use of shelters
on the ice.

The shelters must be temporary, and
have to be removed at the end of
each fishing day. A windbreak of
wood and canvas, not over five feet
square is permitted. Ice fishermen in
the northern zone of Illinois have a
chance of getting some northern pike,
as well as panfish but in central and
southern Illinois panfish is about all
that can be expected.

The 1948 state fishing licenses are
good until January 31, 1949.

On January 1 there were 410,236-
000 bushels of corn in farm storage on
Illinois farms. This is the record for
this date.

A Brand New Fabric

HERE'S a brand new rayon fabric that's bound to cause a buzz among economy-minded homemakers! The beret and shoes pictured above are made of Avisco rayon flock—millions of tiny rayon fibers securely attached to a firm surface. These fibers create the appearance of velvet and the texture of suede in a fabric that is as durable as any in existence. Called "Norzon," it is amazingly inexpensive—and you'll soon be seeing it in handbags, bridge table covers, upholstery, and other fashion and home items. If you would like to receive a helpful leaflet entitled, "Care of Rayon Home Furnishings," write the Woman's Page Editor of this newspaper, enclosing a stamped, self-addressed envelope.

PURE MILK ASSO. ANNUAL MEETING IN CHI. MARCH 12

Three thousand dairy farmers, all members of Pure Milk Association the largest milk co-operative supplying Chicago and its suburbs, are expected to attend the annual meeting of the association to be held in the Sherman Hotel, Chicago Saturday the 12th of March.

This is the twenty-fourth annual meeting of the organization which represents some 14,600 dairy farmers in Illinois, Wisconsin, Indiana and Michigan. The meeting will be called to order promptly at 9:45 a. m. by W. J. Swayer, Gurnee president of Pure Milk Association.

Reports on the activities and progress of the organization during 1948 will be presented by W. J. Swayer, Gurnee, Illinois, president; W. E. Winn, Richmond, Illinois, treasurer; R. P. Alexander of Chicago, comptroller; F. J. Knox of Waukegan, director of sales; and C. M. Cosgrove, Elgin, secretary.

Mrs. Haven Smith, Chapell, Neb., vice-president of the Nebraska Farm Bureau, will speak before the group at 11 a. m. on Values in Rural Living. Dr. J. O. Christianson of the University of Minnesota will address the meeting in the afternoon and will talk on the subject, Our Part in the World.

A. W. Colebank, federal milk market administrator will speak before the group on the federal milk order in the Chicago milk shed. The Chicago milk shed has been under a federal order for the past nine years.

Lunch will be served to all members their wives and guests in the various ballrooms of the Sherman Hotel promptly at 12 o'clock noon.

A. H. Lauterbach, general manager of Pure Milk association who has been on a leave of absence because of illness, will be present to address the group and resume his active duties. Election of officers will be held during the meeting.

Springfield State's Attorney Declares Bingo is Gambling

Whether bingo games are gambling and banned by state law was disputed by the state's attorney and a Roman Catholic prelate of Springfield.

State's Atty. George P. Coutrakon labeled bingo as gambling and ordered police to investigate the weekly game sponsored by the Cathedral Boys high school booster club.

The games are held in the old cathedral, no longer used as a church. A 50 cent admission fee is charged, and proceeds go to the Catholic Boys high school.

Coutrakon also cracked down on other organizations conducting bingo. The prosecutor's action was termed "unfortunate" by Msgr. John B. Franz, administrator of the Springfield Catholic diocese since the death of Bishop James A. Griffin last August.

Monsignor Franz asserted that "betting, gaming and lottery are in the category of human acts which take their ethical status from the circumstances in which they are involved." Coutrakon declared it is "impossible to draw lines between gambling for charitable purposes and commercialized gambling for private profit."

Monsignor Franz said that "generally speaking" gambling in fraternal organizations or at benefits sponsored by charitable, religious and educational agencies "will not involve unethical circumstances, and therefore should not come under the ban of prohibitory law."

Coutrakon said he didn't know what action would be taken if bingo games continue to operate.

Prices paid by farmers, including interest and taxes are down less than 2 percent from July.

Prices of most feeds have risen from the low points reached last fall.
